Subject: Re: Leavenworth draft BiOp: first half for review

Good morning,

This is a friendly reminder to please have any suggestions for edit by COB today if you have not done so already.

Also, the second half of the BiOp is still in review with our General Counsel, so it will not likely to be ready to be sent out today. I apologize for the delay.

Please let me know if you have any questions or concerns.

Thanks,
Emi

Good morning,

Please see attached for the first half of the Leavenworth draft Biological Opinion. You are being asked to review the draft Biological Opinion because of your technical expertise. Please do not distribute the attached draft outside of your group. Please limit your review to fatal flaws, major discrepancies, or oversights that inaccurately describe program operations such that programs could not to be operated as described, or that would immediately cause programs to be out of compliance with the terms of the Biological Opinion. In particular, NMFS would like you to review the following information:

- Ensure that the Proposed Action correctly characterize the technical components of the project and related implementation.
- Ensure that the species and resources in the action area and baseline conditions are correctly described.

To streamline the method of feedback, please use the attached word document as a template for documenting your feedback, keeping in mind that this draft is still a working draft and contains placeholders for content/citations.

If you are interested in me walking you through the changes, please respond with your availability from one of the time slots below. If you are not available for any of the time slots below, please provide me with 2 time options for me to call you directly.

- 3/23 (Thurs) - 2 pm
- 3/24 (Fri) - 10 am
- 3/27 (Mon) - 1 pm
- 3/28 (Tues) - 9 am

Please let me know whether you have edits to suggest by **COB, April 3rd (Monday)**, keeping in mind that the review of the second half of the BiOp may overlap with this timeline.

Please do not hesitate to contact me if you have any questions or concerns.

Thank you,
Emi
